Trend Micro Endpoint Security	<ul style="list-style-type: none"> • Comprehensive Web Threat Protection: Breaks the infection chain by blocking access to malicious sites. Leverages our industry-unique in-the-cloud reputation service, with millions of dynamically rated sites. Provides real-time protection in any networking scenario regardless of connection type • Extended Platform Support: Protects multiple server platforms, client machines and mobile users from multiple threats. Enables efficient resource utilization, with support for virtualized environments and Citrix Terminal server. • Extensible Architecture: Supports plug-in modules designed to add new security features without having to redeploy the entire solution. Reduces effort and time needed to deploy new security capabilities to clients and servers across your network • Ease of Management: Provides centralized management across entire network using Trend Micro Control Manager. 	<p>For Price details, please contact at: Sales.in@trendmicro.com</p>
Comodo Endpoint Security Manager	<ul style="list-style-type: none"> • Proactive Defense +: Heuristic Intrusion Prevention System (HIPS) detects and blocks anomalous and suspicious activity. Proactively protects your critical operating system files, registry entries and personal data from internal attacks by root-kits, key-loggers, Trojans and other malware. • Application Whitelisting: Allows execution of only known good code. Comodo has more than 1.1 millions entries in its database. Centrally controls which applications and devices are allowed to operate, thereby preventing malicious software and data leakage. • Real Time AV: AntiVirus Software Prevent, Protect and Defend your computer against attacks. Comodo's AntiVirus Software will scan your computer AND remove viruses on a schedule that works for you. AV Scans files and execution requests in real-time • Performance friendly, low memory / CPU utilization doesn't bog your computer down with needless tasks. • Endpoint Security Managers adds remote and centralized administration, and integration of Comodo endpoint security product suite. 	<p>For Pricing detail:</p> <p>US: +1 888 256-2608* International: +1.703.637.9361 Email: EnterpriseSolutions@comodo.com</p>
GFI EndPoint Security	It allows administrators to actively manage user access and log the activity of a wide range of devices. It also helps administrators to prevent data leakage/theft by comprehensively controlling access to portable storage devices with minimal administrative effort; prevent the introduction of malware and unauthorized software on the network; and gives administrators greater control by being able to block devices by class, file extensions, physical port or device ID.	Prices start at US\$750 for 25 computers and include maintenance for 1 year.
